A front-end developer with about two years' experience and a track record of building a user friendly and responsive website through a front end interface. I have a vast ability of strategizing design layouts that further enhances effective user experience. I possess a firsthand practical knowledge of programming languages such as HTML, CSS, JavaScript, DOM and the React Framework. My in-depth understanding of these web technologies put me at a great advantage of coding explicitly the user interface (frontend) of a website. I have worked on multiple projects and utilize my knowledge of front-end development to enhance several website loading speed.

As a front-end developer with couple of years of experience, I have a flair for great solutions to challenges and as well possess a topnotch problem solving skill. The world of technology is dynamic, hence my flexible approach in adjusting to various changes, upgrade and advancements consistently experienced in the tech world. I write amazing optimized codes the best way possible. I am also a professional in writing clean codes and most times leverage on the clean code philosophy to come up with codes that are quite simple to understand, easy to maintain and manage. My interpersonal skills includes creativity, diligence, hard work and timeliness.
